Living conditions

Juan is a lovely and active boy, he likes to share with his friends, his favorite subject is reading. Juan's mother is the only one who works very hard to give the best for her family, but sometimes she can not cover all the needs because she does not have stable salary, she works as a merchant. Juan's mother would like that he can study but sometimes she is not capable to cover it, for this reason she asks the support in order to Juan can be part of the program and of this way, he can get education and his future could be better.

Juan's house is built with blocks walls and tin roofing, they have some furniture, they have bathroom with 1 toilet, the toilet is built with cement and it is a deep hole in the land, they have water and electric services. Juan lives with his mother and sister called Maria, she is 18 years old, she is studying. Juan's father abandoned them and he does not support them with anything.

Juan lives in a department called Solola, there are forests, one big and beautiful lake, volcanos, mountains, etc. the people to cover all the needs, they have different occupations, for example, merchant, builder, seller in the market, carpenter, etc.

In this department the economy is good but with needs because they do not have opportunities to work because some people can not write and read, and where Juan is studying is good because there are different programs for example Aflatoun in this program the children learn to save, it is important for them and bible class, they learn about God's word, Pablo is happy in the school. Juan and his family are thankful with you for your generous heart, you are such a great person, because with your generous support Juan can get education and her future will be awesome, God bless you.
